Service

SMC specializes in **Technology Infrastructure & Information Transport**. Now, you may not be familiar with these terms. Simply put, it is the cabling, structure, terminations, and connectivity, which serve as the physical transport for today's high-speed data (broadband), voice, video, and security networks.

Value

Put another way, **SMC** delivers turnkey telecommunications infrastructure solutions with a team of certified, experienced technical personnel using cutting edge technology products and top of the line equipment to ensure your job is done well, on-time, on-budget, minimizing hassles and disruptions and satisfying you and your customers.

Partnership

SMC is proud to build long-term relationships with world-class companies like yours to provide solutions to you, your customers and end-users. **SMC** brings over 25 years experience in working with Federal (DOD, Civilian, & Secure) and State Government Agencies & Universities, System Integrators, Network Carriers, Hospitals, Commercial & Financial Organizations, Developers, General / Mechanical Contractors, and Leasing Agents.

Guarantee**

Technology Infrastructure & Information Transport

Comprehensive

SMC ISP-Communications technicians maintain top-of-the-line certifications from prestigious technology product companies such as Systimax, Uniprise, Corning, Hitachi, Remeo, and Holocom. System solutions include application-based Intelligent Patching and 360 Profile patch panels.

SMC OSP-Field Services utilizes certified operators for advanced excavation equipment, such as trench-less directional boring, aerial, and underground while following stringent guidelines for safe operation.

SMC is large enough to provide you the resources and solutions you need, and yet small enough to be flexible and change with your needs or schedules.

SMC has a proven history in the telecommunications infrastructure business and has built a world-class team with the capabilities to service even the most demanding customers.

Investment

Your operation invests heavily in your data, voice, video, and security networking. So that you realize true value, **SMC** invests in our personnel and maintains a technologically advanced product line and specialized equipment inventory to ensure you are receiving leading edge, top quality, and solutions for your infrastructure needs.

SMC's experienced team delivers guaranteed quality workmanship with minimal disruption to you and your customers.
